**Identification and verification**

For a corporate account we need to obtain identification evidence for the corporate entity and in some circumstances the directors and/or shareholders of the entity. We will aim to obtain the identification evidence for the corporate from electronic sources such as Companies House but may ask you to provide further documentary evidence.

For individual shareholders or directors we will use an electronic search for identity and address verification for Anti-Money Laundering/Combating the Financing of Terrorism purposes. If this electronic check does not provide us with sufficient evidence we may ask you to provide further documentary evidence.

**Declaration**

I/We have read this form and to the best of my knowledge the information that I/we have provided is correct. I/We undertake to notify Henderson Rowe of any significant/material changes. I understand that these objectives should be reviewed regularly. I/We have received and read the Henderson Rowe Terms of Business and Schedule of Fees and Commissions.

All parties to the account must sign below. Please note that this Corporate Account Form, together with our Terms of Business and Schedule of Fees and Commissions will comprise your contract.

## Investment Strategies

### Conservative

Risk Level	Low risk – the capital value will fluctuate in the short term, and is unlikely to show significant capital gains above inflation
Time Horizon	Not suitable for investors who have time horizons of less than two years
Assets	75% fixed income investment, 25% equity investment
Objectives	To provide stable returns and to minimise the portfolio's exposure to risk

### Balanced

Risk Level	Medium risk – the capital value will fluctuate in the medium term, and capital returns may be negative over short time horizons
Time Horizon	Not suitable for investors who have time horizons of less than five years
Assets	50% fixed income investment. 50% equity investment
Objectives	To balance generating real returns with maintaining a relatively low risk exposure

### Growth

Risk Level	High risk – the capital value will fluctuate in the medium term, and capital returns may be negative over short to medium time horizon
Time Horizon	Not suitable for investors who have time horizons of less than five years
Assets	25% fixed income investment, 75% equity investment
Objectives	To significantly increase the capital value of the portfolio in real terms

### Aggressive

Risk Level	High risk – the capital value will fluctuate in the medium term, and capital returns may be negative over short to medium time horizons
Time Horizon	Not suitable for investors who have time horizons of less than ten years
Assets	100% equity investments
Objectives	To provide significant capital growth above inflation

### Specialised

Risk Level	High risk – the capital may fluctuate dramatically, capital returns may be negative over the period of the investment
Time Horizon	Individually defined time horizon
Assets	Individually defined asset allocations
Objectives	To meet highly personal objectives; trading strategies that are intended to generate high capital returns over short time periods
